

Your Travel Card serves as your means of identification for cashless payment for the following services:

- Service and maintenance work at the dealership of your choice of the respective vehicle manufacturer.
 - Tyre services at a LeasePlan (Switzerland) AG partner.
 - In case of damage to the vehicle, repair work at a LeasePlan (Switzerland) AG bodywork partner.
-

Travel Card with fuel card function.

If your contract covers the «Fuel card service» option, you will receive a fuel card for the fuel company of your choice. This card also covers all the Travel Card functions.

Please read the security tips on the right.

Safekeeping.

Memorise your PIN code. Never write your PIN code on the Travel Card or in your driver's manual. Always keep the PIN code and the card separate. Card malfunctions can be avoided by ensuring that the magnetic strip on the Travel Card remains intact. Keep the card away from car radios, mobile phones, loudspeakers and magnets. Keep the card out of direct sunlight.

Validity.

Your card has a limited term of validity. You will automatically receive a new card before its validity expires. The PIN code remains unchanged. Please destroy the old card.

Abuse.

To prevent card abuse please destroy the old card the moment you receive your new card. LeasePlan rejects any and all liability in case of card abuse.

Loss or theft.

Your fuel card must be blocked immediately if it is lost or stolen. Theft must be reported to the police. The exact procedure is described on page 41. If a replacement card is issued as a result of card loss/PIN code loss the administration charges as defined in the contract apply.

The Travel Card must always be presented.
