

# Replacing and changing tyres.

Tyre replacement, tyre change and tyre storage must only be carried out by authorised LeasePlan (Switzerland) AG tyre partners. Please note: only the specified original tyre sizes may be fitted. The **list of tyre partners** is provided in this section or at [www.leaseplan.ch](http://www.leaseplan.ch)

When you hand in the vehicle, please instruct the LeasePlan tyre partner to send the invoice to LeasePlan (Switzerland) AG.

This service includes:

- Changing to winter/summer tyres with original-equipment tyre dimensions (or smaller).
- One set of steel rims (if approved for the vehicle, not including hub caps), however, only if alloy rims are the standard original equipment, and if changeover to smaller winter tyres is more cost-effective than original-size winter tyres.

Additional cost items that are not listed as covered will be charged to the leasing customer.

This applies also in respect of tyre replacement under 30,000 km and tyre replacement not required for safety reasons.

Tyres must not be filled with special gases (e.g. nitrogen).

**The Travel Card must always be presented.**
